THE NEW RECIPE FOR HEIGHT ADJUSTMENT OF WORK SURFACES IN KITCHENS

All it takes is the new Baselift system and one service technician

Product News: 12 May 2014

Baselift is a plug & play electric height adjustable system that is easy to mount and can easily be incorporated in the existing kitchen design.

One-person installation

Baselift is a lifting unit within the LINAK® DESKLINE® product range, where all components work together. True systems where everything fits – it is simply Plug & Play. The system is easy to mount and can be handled by one service technician only.

For optimal stability of your height adjustable kitchen or counter, it is important that you consider the number of Baselifts and the placement of these in the base.

Curious to learn how easy it is to mount the Baselift system? Then sit back and watch the Baselift mounting instruction video.

Facts on the Baselift system

For further technical information, data sheets, 3D drawings and relevant literature, please view the [Baselift product page](#) or take a look in this brochure.

Baselift; Ergonomics meets Innovation

Baselift is a compact unit used for height adjustment of kitchens, cabinets and counters.

For further information, please contact your **local LINAK subsidiary or distributor.**
