EXTERNAL TOOL FINISHING KIT

AUTOMATE APPLICATIONS WITH AN EXTERNAL TOOL

• Save hours of programming
• Compensate for external tool wear
• Program with an intuitive interface
• Operate with any expertise level
• Automate one of the toughest, dirtiest jobs

START PRODUCTION FASTER

AUTOMATE FINISHING TASKS THE EASY WAY

SET EXTERNAL TOOL CENTER POINT

Robotiq Finishing Copilot software, which is included in the kit, allows you to program an external TCP. It lets the robot know that the finishing tool is external to the robot, unlike most cobot applications. The finishing tasks is then processed with the robot bringing the part to the external TCP.

COMPENSATE FOR TOOL WEAR

Finishing Copilot’s contact offset node uses a point on the external tool as a reference to measure wear. With 0.2 mm precision, Contact Offset validates the tool’s exact position at any moment. If there’s a slight change, the robot program will automatically adjust all relevant parameters.
