aASRS

AR Technologies

AGILE AUTOMATED STORAGE AND RETRIEVAL SYSTEM (AASRS)

REVOLUTIONISE WAREHOUSE MANAGEMENT

HOW DOES THE αASRS WORKS?

- The Agile Automated Storage And Retrieval System (aASRS) is a multi on-robot racks that allows for multi-pick & place to increase the overall capacity of the robot
- AGV platform provides high mobility to travel freely across the warehouse and workstations
- Intelligent Warehouse Management System that combines the computing prowess of effective Fleet Management and Scheduling, Control and Algorithm Platform, Intelligent Device/Equipment Interface and Big Data Analysis for an optimal operating environment

KEY FEATURES & BENEFITS

7d **7 Days for Deployment. 1 Month to Go Live**
Easy to transform and upgrade your warehouse

Increase Operational Efficiency by 3-4 times
Intelligent picking and handling solution

Increase Storage Density by 80% - 130%
Covers a broader storage space range from 0.25m - 6.50m

Flexible Customisation
Suitable for a variety of application scenarios

Rapid ROI
Significantly shortens the ROI period
